(All K J Somaiya College of Science and commerce Students)

In

at

**Institute of Chemistry, Saint-Petersburg, Saint-Petersburg State
University, **Russia****

In 2014 we are still there.

We qualified the Extramural round once again and team is in competition at Russia with different universities.

During

12-18 Nov 2014

International Natural Sciences Tournament (INST) is a team competition for current undergraduate, Master's students, and students planning to graduate in 2014. Students specializing in Natural Sciences or Engineering are welcome.

**Indian team
YUKTI
stands
overall 8th
as on**

**13 11 2014 after
First round**

**(Wishing them all
the best for
further rounds)**

The main goal of the competition is to teach university students to apply their knowledge to solve important scientific and industrial problems.

Indian team started participating in 2013. An excellent qualified team qualified the Extramural round (rank 19) and was invited to Russia. Team could not go for final rounds due to logistics and financial reasons). Anshul Gupta, an assistant professor at KJSSC, invited as a member of Jury represented there. He is now National coach (INDIA) and member of International organizing committee for the INST.

In 2014 the intramural round of the Tournament is separated in two leagues: International league and the Russian-speaking league. Participants of the International league perform in English both in the extramural and intramural rounds of the

Tournament. Teams of the Russian-speaking league prepare their solutions in Russian.

FINAL RESULTS WILL BE DECLARED ON 18th NOVEMBER 2014
